

## DISCRETE SAMPLING KIT (WABS020 - 25mm)

This component is used when it is necessary to sample through a suspended ceiling. The capillary Tee piece fits onto the pipe run. It is followed by a 2 meter 10mm OD nylon tube which links into the discrete head. The discrete cap is supplied with a solid head, which will necessitate a hole being drilled to the required size by the installer. The discrete end cap is held in place by a hole in the ceiling tile.

### Installation Instructions:

Do not paint.  
Keep pipe clean and free from dust.  
Do not install in direct sunlight.  
Only install with approved pipe.  
Do not use solvents to clean,  
only soapy water.

Technical information for use as  
a guide only.

Pressure values given are based on  
the short term burst pressure at 20°C  
based on a 3:1 safety factor.  
Any increase in temperature above  
20°C will result in a decline in working  
pressure values.
